09 What Make us Unique

Development Financing Starts With a Request

— But Opportunities Start Earlier.

Development opportunities can exist across regions and sectors, but may remain undiscovered until someone identifies them and turns them into a financing request.

The Signals Exist. The Opportunity Is Hidden Within Them.

Connecting these signals can reveal underserved opportunities before financing requests emerge.

ECONOMIC DATA

- Market activity & growth

DEMAND DATA

- Demand patterns & spending

High Demand + Limited Supply + Growth Signals → Underserved Development Opportunity

SUPPLY DATA

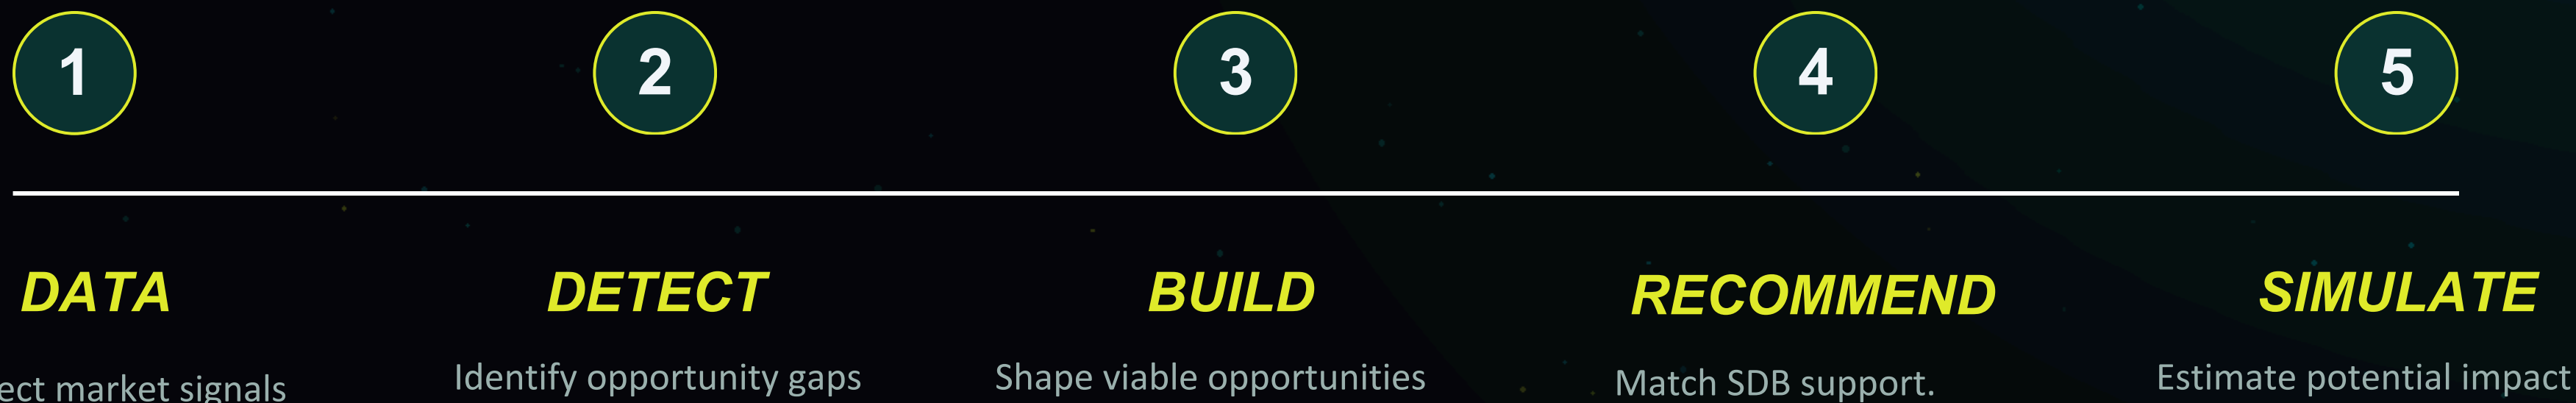

- Businesses & service availability

GEOSPATIAL DATA

- Location & regional distribution

Turning Hidden Signals Into Development Opportunities

ATHAR 360 — AI-Powered Development Intelligence

ATHAR 360 combines AI, Advanced Analytics, Geospatial Intelligence, and Digital Twin simulation to discover underserved opportunities and turn them into actionable development decisions

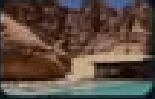

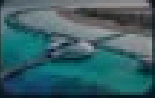

Where should development happen next?

ATHAR scans development signals across regions and surfaces where demand outpaces financed supply.

Regions under scan

	Qassim NEW Buraidah and surrounding governorates	89
	AlUla AlUla Governorate	87
	Red Sea Umluj and Al Wajh	74
	NEOM Surrounding communities	61

Modeled / synthetic scenario data

Beneficiary Experience

From Reactive Financing to Proactive Development

REACTIVE → PROACTIVE

TODAY: REQUEST-DRIVEN

- » Receive beneficiary financing requests
- » Evaluate opportunities after they are proposed
- » Measure impact after intervention

WITH ATHAR 360: OPPORTUNITY-DRIVEN

- » Discover opportunities earlier
- » Guide resources toward high-potential gaps
- » Simulate impact before intervention

Turning Data Into Development Intelligence

Better intelligence. Better allocation. Greater impact

FOR SDB

Earlier Opportunity Visibility

- Discover underserved gaps before financing requests emerge.

Smarter Resource Allocation

- Direct financing and support toward higher-potential opportunities.

FOR BENEFICIARIES

Better Business Direction

- Guide entrepreneurs toward opportunities supported by market signals.

Stronger Sustainability Potential

- Reduce exposure to saturated or low-demand markets.

Supporting Saudi Arabia's Development Future

- » SME & ENTREPRENEURSHIP GROWTH
- » REGIONAL DEVELOPMENT
- » SMARTER DEVELOPMENT INVESTMENT

Vision 2030 Target:

35%

SMEs' Contribution to Saudi GDP by 2030

- » Source: Saudi Vision 2030, Vision 2030 Executive Summary (2024)

We Won't Stop Here

FUTURE ENHANCEMENTS

***Establish
Opportunity Criteria***

***Learn from SDB
Decisions***

***Automate
Opportunity
Approval***

***Expand to Other
Services***

What Make Us Unique

Focusing on areas of weakness to grow further and greater.

01 — OPPORTUNITY BEFORE REQUEST

- Find opportunities before customers ask

02 — DEVELOPMENT NEED FIRST

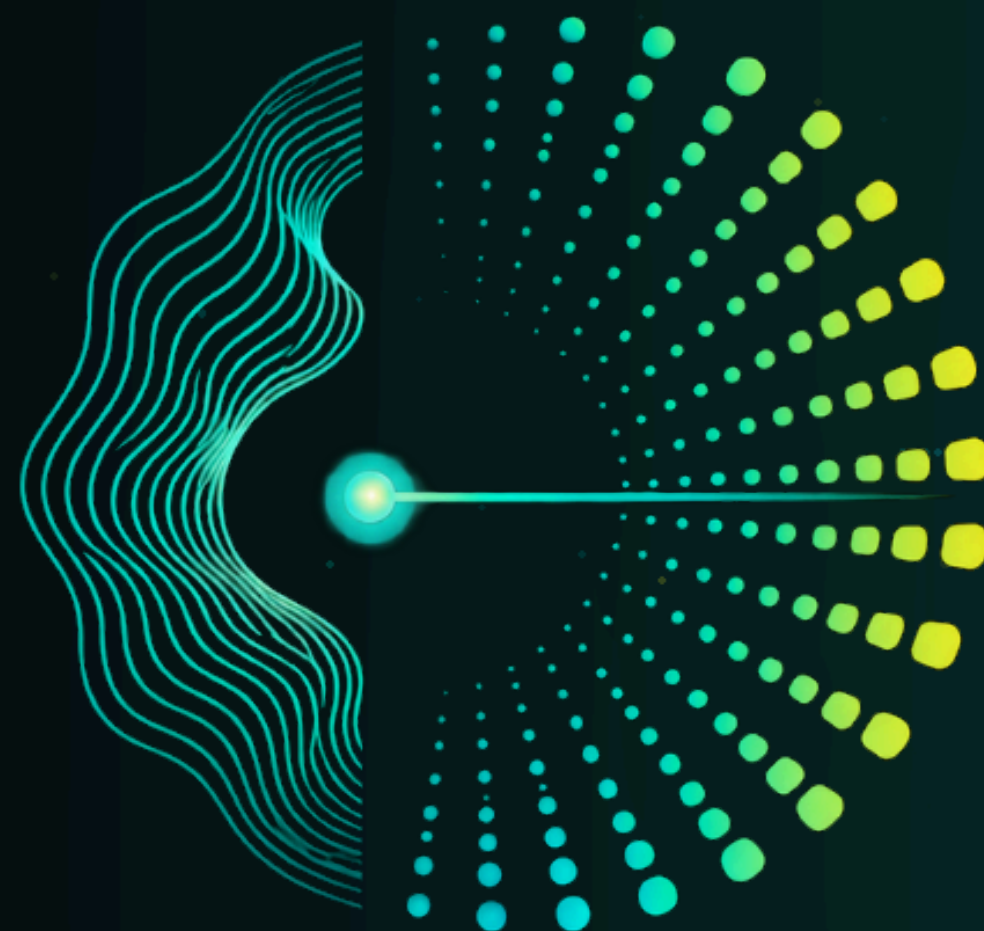

- Focus on where development is needed

03 — SMARTER RESOURCE ALLOCATION

- Direct SDB resources toward greater impact

04 — SIMULATE BEFORE ACTION

- Estimate impact before committing resources

ATHAR 360

See the need , create the Athar

THANK YOU FOR LISTENING.
